”

A classic and comfortable t-shirt is the foundation of all wardrobes

THE ESSENTIAL TEE

All self-respecting clothing brands offer an everyday t-shirt. At Nimbus we call it Montauk. Made from the finest cotton, combined with a small amount of Spandex to maintain its shape and to ensure freedom of movement. Montauk can be used alone or combined with a shirt, jacket or sweatshirt, the possibilities are endless - in short, a must have in any wardrobe.

MONTAUK

MEN

Fabric 95% OCS certified organic Cotton, CU1038206 (combed) / 5% Spandex (single jersey)
Colour Black, Navy, White | **Weight** 200 g/m² | **Size** S - 4XL

WOMEN

Fabric 95% OCS certified organic Cotton, CU1038206 (combed) / 5% Elastane
Colour Black, Navy, White | **Weight** 200 g/m² | **Size** XS - 3XL

THE PIQUÉ TEE

The piqué t-shirt Danbury is a unique piece, which can be used for a variety of occasions. It is a perfectly fitted t-shirt, made from the comfortable cotton-elastane fabric we use for our popular Harvard polo. The fabric adds more shape, which prevents it from curling and makes it feel extremely comfortable against your body. Overall, Danbury gives a classic, well-dressed look and is therefore suitable as a substitute for a polo or a shirt.

DANBURY

MEN

Fabric 95% OCS certified organic Cotton, CU1038206 (combed) / 5% Elastane

THE LUXURIOUS CLASSIC POLO

The luxurious Yale polo is a classic two thread piqué made from fine combed organic cotton. It’s unique cut ensures a perfect fit, and with the placket, forwarded double stitches at the shoulders and a slightly stiff collar, Yale is the perfect polo for emphasizing a traditional and stylish appearance. The characteristic coloured decoration details at the neck tape and at the bottom slits add contrast to the classic colours. Yale is inspired by the timeless Nordic trends, where dressing in both a stylish and casual way is a must for any admirer of Scandinavian Apparel.

**Designed with quality yarns
for comfort and softness**

ELEGANT BUTTONED CARDIGAN

The Brighton Cardigan is a timeless wardrobe staple, blending understated elegance with soft comfort for effortless everyday style. Knitted from OCS-certified organic cotton with a touch of polyamide (nylon), this fine-gauge knit offers excellent shape retention and a smooth, modern fit. Providing soft comfort, it is perfect for layering across seasons, whether worn over a shirt for a polished look or paired casually with everyday essentials. Designed with a feminine round neckline, set-in sleeves, tone-in-tone buttons, and rib at the sleeves and bottom hem, the Brighton cardigan delivers a sleek silhouette with refined simplicity.

EXTRAFINE MERINO KNIT

A classic wool knit is a timeless key piece in any wardrobe. Extra-fine merino wool, from Italian Zegna Baruffa, makes our exclusive knit luxuriously soft, lightweight and breathable. Beaufort is the perfect layering option for all year round and will add sophistication to any outfit.

BEAUFORT

WOMEN

Fabric 100% merino Wool (extra fine - 19,5 micron) | **Colour** Black, Navy, Grey Melange
Weight 257 g/m² | **Size** XS - 2XL

LUXURIOUS MERINO BLEND CARDIGAN

The Phoenix cardigan is a musthave for cooler days. Spun in a super fine luxurious merino blend and detailed with fully fashioned finish. The feminine round neck, set in sleeves and elegant buttons for women, and the two-way zipper, saddle sleeve shoulders and a more sturdy collar for men make this cardigan the perfect layering piece for both a casual and a formal look.

PHOENIX

WOMEN

Fabric 50% merino Wool, Biella Yarn / 50% Anti-pilling Acrylic
Colour Black, Navy, Grey melange | **Weight** 155 g/m² | **Size** XS - 3XL

BIELLA YARN

CLASSY LUXURY MERINO BLEND

No matter the occasion, the Ashbury pullover in a super fine luxurious merino blend, makes a great addition to any wardrobe. Detailed with an elegant v-neck, fully fashioned finish and set in sleeves, this soft and comfortable classic pullover is a safe choice to update your look regardless of season.

ASHBURY

MEN

Fabric 50% merino Wool, Biella Yarn / 50% Anti-pilling Acrylic

Layer up in style with lighter outerwear

HIGH-PERFORMANCE SHELL JACKET

Yosemite is a sleek, high-performance shell jacket designed for those who move seamlessly between city life and the outdoors. Made from durable 3-layer Pro Shell fabric - cleverly uniting three layers in one shell - and recycled polyester, it offers waterproof, windproof, and breathable protection. A refined matte finish and clean silhouette provide a modern, minimalist edge, while the stretchability of the fabric provides natural mobility without added bulk. Smart details enhance both function and form: water-repellent zips, discreet ventilation under the arms, an inside pocket, and an adjustable hood and hem for a tailored fit. Fully taped seams and a Bionic Finish® ECO water-repellency treatment complete the look and the protection.

Embrace the elements with warm quality outerwear for any occasion

SOPHISTICATED LIGHTWEIGHT DOWN JACKET

Combining thoughtful craftsmanship with advanced textile engineering, Avalon is a sophisticated down jacket designed for reliable warmth and everyday versatility. Crafted with a durable shell made from recycled polyester and spandex, treated with a water-repellent finish, Avalon offers both weather resistance and a refined, athletic silhouette. Inside, duck down and feathers deliver lightweight insulation with 650+ fill power, all contained within innovative Loom Woven channels that prevent feather leakage and eliminate traditional visible stitch lines for a clean, streamlined finish and long-term warmth. The men’s version has elasticated cuffs and hem, and a ribbon at the top of the collar.

LIGHTWEIGHT STRETCH JACKET

Eastlake is an insulated jacket designed for those who value minimal weight and a clean, modern design. Crafted with advanced lightweight and stretchy materials, this jacket provides comfortable warmth without the bulk. Its elegant matte finish and streamlined silhouette make it an essential transitional jacket that embraces functionality and fashion. The men's version features a classic cut, visible main zipper, and comfortable elasticated cuffs and hem. The women's version is designed without rib, but with a wind placket covering the main zipper for a more feminine expression.

SIZE GUIDE

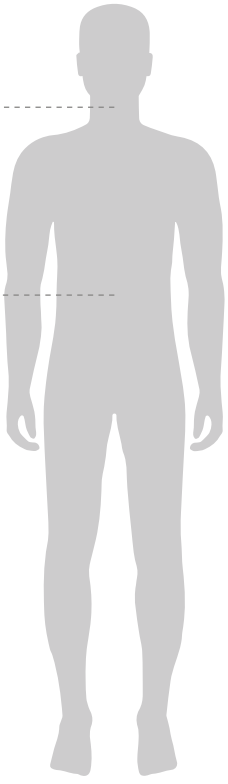

FINDING THE RIGHT SIZE

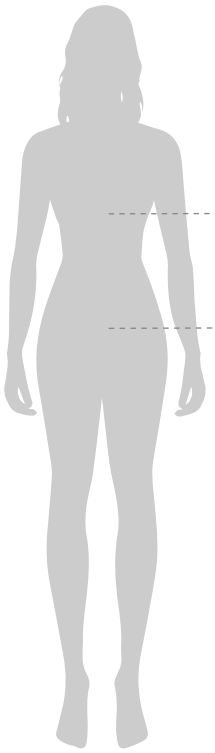

To ensure your complete satisfaction, we recommend that you check your measurements against our sizing chart to determine the right size for you. Make sure to measure directly on the body and then find your size in our size guide.

All measurements are in centimeters.

Feel free to contact our Customer Service at **customerservice@nimbusnordic.com** if you have additional questions about our sizes.

HOW TO MEASURE

NECK

Measure around the base of the neck, where the collar sits.

WAIST

Measure the narrowest part of your upperbody.

CHEST

Measure just under your armpits and across your shoulder blades.

HIP

Measure around your widest part while standing with your feet together.

WOMEN

NIMBUS ACADEMY

WHAT IS NIMBUS ACADEMY?

Nimbus Academy is an educational platform primarily targeted at our sales force, external partners, and key customers. Its goal is to enhance overall knowledge on the most relevant topics in our industry.

A well-trained sales force

COTTON KNOWLEDGE

HIGH QUALITY COTTON

We carefully select our cotton and its processing to ensure the highest quality.

LONG STAPLE COTTON

Cotton can be divided into two broad groups: long staple cotton and shorter staple cotton. Long staple cotton yields exceptionally long fibres and is known for weaving strong, soft, and durable high-quality fabrics due to its superior strength and uniformity.

The use of high-quality long staple cotton in all our products is one of the reasons our cotton products stand out from the crowd.

COMBED COTTON

Combed cotton is made by treating the cotton fibres before they are spun into yarn. The harvested cotton is passed over fine brushes (the 'combs') to remove impurities and short fibres. About 15% of the volume is removed in this process, leaving only long, straight fibres.

The slivers of combed cotton are then spun into thread. Generally, combed cotton is more expensive than conventional carded cotton.

RING-SPUN COTTON

The yarn created for ring-spun cotton is spun in a way that produces stronger and longer threads, as it is continuously twisted and thinned to create an extra-fine string of fibres.

During this process, the threads are compacted to produce a very strong and durable material. The more times the fibre has been spun and twisted, the softer it feels. Open-end yarn that is not ring-spun often results in fabric with a rough texture.

FOLCROFT

INSULATION KNOWLEDGE

THERMAL INSULATION

Protection against cold is dependent on thermal resistance or thermal insulation of the garment. Sorona® fibres provide high thermal insulation while retaining optimal warmth with less filling and weight, creating a more comfortable garment.

SORONA® FIBRE

At Nimbus, we use top-of-the-line materials in our products, and with Sorona® Aura, we offer lightweight, breathable, and warm features with sustainability in mind.

Sorona® Aura fibre is an eco-efficient performance fibre. It is partially plant-based and can be recycled in any normal polyester recycling stream.

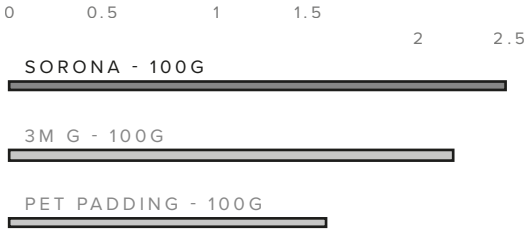

The main benefits for the consumer are seen over the life of the garments, as Sorona®-based fabrics maintain a high level of stretch, recovery, and colour fastness, wash after wash.

PATENTED TECHNOLOGY

Sorona® is produced with PDO, a building block with endlessly versatile potential, using a biological process. 37% of the polymer is made using annually renewable plant-based ingredients. The revolutionary Bio-PDO compound turns a formerly chemical process into an eco-efficient biological one.

INSULATION VALUE OF YOUR CLOTHING

50 % higher CLO value = Higher warmth than non branded insulation

sorona® AURA

MERINO BLEND KNOWLEDGE

BIELLA YARN BY SÜDWOLLE

For our Merino wool blends, we have chosen
Biella Yarn by Südwolle as our yarn supplier.

MERINO WOOL

At Nimbus, we use top-of-the-line materials. Biella Yarn is the premium label of the family-owned company Südwolle Group. The name refers to the town of Biella in northern Italy, which has been leading the manufacturing of wool since the 1800s.

Biella Yarn offers some of the highest quality Merino yarns available on the market — spun from Merino wool, which is finer and softer than regular wool and sourced from Merino sheep. Merino sheep have developed the softest and finest fleece, and with modern spinning technology and fibre treatments, Merino wool produces outstanding fabrics and final garments, bringing together style, comfort, and performance in perfect harmony.

OUR MERINO BLENDS

Südwolle has specialised in spinning, dyeing, and blending wool with other fibres, and their yarns have the latest eco-certifications, including Bluesign and Oeko-Tex standards.

In our Nimbus Merino blend programme, the yarn is made of 50% Biella yarn and 50% anti-pilling acrylic, which ensures that the knit keeps its fit. The fine Merino blend gives the knit a soft, light, and luxurious touch. Furthermore, the yarn is top-dyed, which means that the fibres are dyed before spinning the yarn — compared to yarn-dyed, where the yarn is dyed after spinning. This gives the yarn a super-soft touch.

Biella Yarn
BY SÜDWOLLE

BEAUFORT

MERINO CASHWOOL® KNOWLEDGE

TOP QUALITY YARN FROM ZEGNA BARUFFA

For our 100% Merino cashwool® products, we have chosen Zegna Baruffa Lane Borgosesia as our yarn supplier.

MERINO WOOL

Products made from 100% Merino wool are crafted from top-quality material. Merino wool is a natural material shorn from Merino sheep, a breed characterised by its very fine and soft wool — the thinner and softer fibres make Merino a premium material and one of the most popular, high-quality wools for knitwear. Merino offers high levels of warmth, breathability and softness against the skin..

ZEGNA BARUFFA

Zegna Baruffa is a stamp of quality. The company Zegna Baruffa Lane Borgosesia is considered one of the leading spinners from the Biella area, Italy's wool capital. They produce some of the highest quality Merino yarns on the market by integrating traditional manufacturing practices with technological innovations and the pride of Italian craftsmanship, combined with a worldwide perspective.

Sustainability is a central value within Zegna Baruffa, and throughout their history, they have won several awards for ethical and social practices. All their products are Oeko-Tex certified.

DOWN KNOWLEDGE

NATURAL INSULATION

Down is known for its impressive warmth-to-weight ratio, compressibility and overall comfort. In terms of warmth, nothing can rival down — not even the best synthetics on the market that have been specifically engineered to replicate the qualities of down.

WHAT IS DOWN?

Down is the layer of “feathers” that are closest to a bird’s body. It is a very small part of the bird, growing as an undercoat on the belly and protected by a layer of feathers. Down is NOT the same as a feather; it has a completely different structure.

DOWN FILL POWER

Fill power refers to the quality of down. Fill power is simply a measurement of loft, indicating the amount of air trapped in cubic inches per 30 grams of down. It does not refer to the amount of down used. The higher the number (800 fill, 700 fill, 600 fill, etc.), the better the down and the more loft and warmth it will provide.

NO LIVE PLUCKING

DOWN AND FEATHERS ARE NEVER
REMOVED FROM LIVE BIRDS

NO LIVE
PLUCKING

We have a NON LIVE-PLUCKED Guarantee
certificate from our down suppliers.

SUSTAINABILITY

SUSTAINABILITY IS A KEY PRIORITY AT NIMBUS.

At Nimbus Nordic A/S we continuously take new steps to strengthen our practices and become even better at what we do.

One of our key priorities is to design and create products with sustainability in mind.

We aim to minimise the impact on the environment and protect the well-being of future generations.

To uphold our GRS and sustainability strategy, we are very selective about who we cooperate with. By using audits and assessment tools to select and monitor factories, and by favouring fewer partners over many, we build long-lasting and close partnerships with our suppliers.

We strive to implement a sustainable and ethical approach throughout our entire supply chain. For example, 93% of our styles are produced in Amfori*-audited factories, and many of our products have obtained product certifications, which are explained further on the following pages.

**Amfori is the leading global business association for open and sustainable trade.*

PRODUCT CERTIFICATIONS & STANDARDS

We strive to implement a sustainable and ethical approach throughout our complete supply chain. As a validation of our sustainability efforts, many of our products have obtained product certifications. On the following pages, we explain the different certifications and recognised logos.

OEKO-TEX® STANDARD 100

STANDARD 100 by OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety. Clothing manufactured under the principles of OEKO-TEX® meets requirements for pH value and the content of harmful substances, such as pesticides and heavy metals.

OEKO TEX®
STANDARD 100

CERTIFIED ORGANIC COTTON

Organic cotton is cotton grown without the use of synthetic pesticides, artificial fertilisers, and other toxic chemicals. By law, organic cotton plants cannot come from genetically engineered seeds, and strict regulations dictate how cotton must be grown to be certified organic.

CHANGING TO

We are continuously working to improve our organic labelling so that our products comply with an even better, stricter, and more comprehensive standard called OCS.

OCS

The Organic Content Standard (OCS) is an international, voluntary standard that provides chain of custody verification for materials originating from a farm certified to recognised national organic standards. The standard is used to verify organically grown raw materials from the farm to the final product.

OCS BLENDED

Applies to products made with a minimum of 5% organic cotton mixed with conventional cotton or synthetics materials.

OCS 100

Applies to products made from at least 95% organic cotton mixed with conventional cotton or synthetics materials. The cotton used must be certified 100% organic.

HEIQ FRESH

HeiQ Fresh is a family of silver-free odour control textile technologies with ingredients that are either bio-based or mineral-based. HeiQ Fresh products effectively tackle the problem of smells on textiles by absorbing VOCs (volatile organic compounds or "smelly molecules"). HeiQ Fresh is Bluesign-certified, a certification that applies to chemicals, processes, materials, and products, ensuring they are safe for the environment, workers, and consumers.

SPANO® NON-IRON TECHNOLOGY

At Nimbus, softness of touch and ease of ironing have always been top priorities, which is why we apply a special treatment to our business shirts.

Spano Advanced cotton technology takes non-iron to the next level. With this innovative technology, we can deliver Oeko-Tex®-certified fabrics for our non-iron shirts.

The “Advanced cotton” technology enables us to enhance the core structure of the fibres from within. Unlike conventional methods that apply chemicals to the finished product, this Inside Cross Linking technology ensures superior recovery and guaranteed flattening after washing, resulting in long-lasting non-iron benefits.

SPANO
SUPER NO-IRON

BIONIC FINISH® ECO

BIONIC-FINISH® ECO represents an ecological technology with unique non-halogenated, APEO-free, and fluorine-free formulations for permanent water-repellent finishing. This eco-friendly water-repellent treatment offers a range of consumer-friendly features, such as repelling water and aqueous soiling substances, being washable, and suitable for all fibre types. It has the added benefits of not affecting breathability, being free from fluorinated compounds, and being formaldehyde-free. BIONIC-FINISH® - Registered Trademark of RUDOLF GmbH

BIONIC
FINISH®ECO

SUGENRO®

Sugenro® is a recycled thermal insulation wadding. GRS-approved Sugenro® fibre is made from recycled polyester and provides padding that guarantees warmth and breathability while being environmentally friendly.

MADE WITH SUGENRO® INSULATION

SORONA® AURA

Sorona® Aura fibre is an eco-efficient performance fibre. It is partially plant-based and can be recycled in any normal polyester recycling stream. Sorona® Aura is a top-of-the-line material, which offers lightweight, breathable, and warm features. The main consumer benefits are seen over the life of the garments, as Sorona-based fabrics maintain a high level of stretch, recovery, and colour fastness wash after wash.

sorona® AURA

DOWN INSULATION

Down is widely considered to be the best insulator, and at Nimbus, we aim to offer high-quality, leading materials. Down feathers are both biodegradable and recyclable, and by ensuring that our suppliers guarantee no live plucking, we uphold the ethical use of down.

DOWN FEATHER INSULATION · 650+ FILL POWER · DOWN FEATHER INSULATION

RDS

Products certified to the Responsible Down Standard (RDS) contain down or feathers from farms certified to animal welfare requirements.

RESPONSIBLE DOWN STANDARD · R·D·S · CERTIFIED · ©TextileExchange

RECYCLED FABRIC

Fabric made from recycled components reduces the use of virgin materials and is a step towards increased circularity.

CHANGING TO

We are continuously working to improve our recycled fabric labelling to meet the stricter requirements of GRS certification, ensuring higher transparency and sustainability throughout the supply chain.

GRS

Products certified to the Global Recycled Standard (GRS) contain recycled material that has been verified at each stage of the supply chain, from the source to the final product. In addition, facilities from the source to final supplier have met social, environmental, and chemical requirements.

QUALITY CONTROL

MEETING INTERNATIONAL STANDARDS

We make sure to meet international standards by working with trusted partners, which function as global benchmark for quality and integrity.

We ensure that we meet international standards by working with trusted partners, who serve as global benchmarks for quality and integrity.

Quality is essential to our brand, and by simultaneously prioritising classic designs over innovative ones and simplifying future collections, we extend the life of our range and adhere to the philosophy of Slow Fashion.

As quality is our highest priority, all our productions are inspected locally by our own team or by third-party agencies before being shipped from production sites.

In China and Bangladesh, we operate our own facilities, where our loyal and valued colleagues constantly monitor product quality and factory performance.

Products made with performance fabrics or membranes, which add features like water resistance or breathability, are tested to ensure they meet the required standards. These styles are tested by third-party laboratories according to international standards.

AMFORI

Nimbus is a member of amfori BSCI (Business Social Compliance Initiative). Amfori BSCI conducts audits to evaluate labour conditions, safety, and working environments at supplier sites. Over 90% of our styles are produced in amfori-audited factories. These audit reports enhance transparency and provide assurance that we collaborate with sustainable suppliers. This allows us to promote and verify safe and fair working conditions, as well as ethical business practices, throughout our supply chain.

SMETA

SMETA (Sedex Members Ethical Trade Audit) is an audit that evaluates labour conditions, safety, and working environments at supplier sites. SMETA audit reports enhance transparency and provide assurance that we work with sustainable suppliers. This allows us to promote and verify safe and fair working conditions, as well as ethical business practices, throughout our supply chain.

QIMA

QIMA is a global leader in quality control and compliance services, securing, managing, and optimising the quality and compliance of our products and suppliers.

All auditors and inspectors at QIMA are managed by quality control and auditing specialists to ensure compliance with international standards.

INTERTEK

Intertek delivers Total Quality Assurance solutions for textile products. Their comprehensive services enable us to ensure quality and safety with precision.

At Nimbus, we primarily use Intertek solutions for fabric and chemical testing.

SGS

SGS is the world's leading inspection, verification, testing, and certification company.

At Nimbus, we use SGS services for both fabric testing and third-party inspections of productions.

PRODUCT CERTIFICATIONS & STANDARDS

We strive to implement a sustainable and ethical approach throughout our complete supply chain. As a validation of our sustainability efforts, many of our products have obtained product certifications, and below we explain the different certifications and recognized logos.

RECYCLED FABRIC

Fabric made of recycled components reduces the use of virgin materials, and is a step towards increased circularity.

GRS - GLOBAL RECYCLED STANDARD

Products certified to the Global Recycled Standard (GRS) contain recycled material that has been verified at each stage of the supply chain, from the source to the final product. In addition, facilities from the source to final supplier have met social, environmental, and chemical requirements.

ORGANIC COTTON

Organic cotton is cotton grown without the use of synthetic pesticides, artificial fertilizers, and other toxic chemicals. By law, organic cotton plants cannot come from genetically engineered seeds, and strict regulations dictate how cotton must be grown to be certified organic.

OCS - ORGANIC CONTENT STANDARD

The Organic Content Standard (OCS) is an international, voluntary standard that provides chain of custody verification for materials originating on a farm certified to recognized national organic standards. The standard is used to verify organically grown raw materials from the farm to the final product.

OEKO-TEX® STANDARD 100

STANDARD 100 by OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety. Clothing manufactured under the principles of OEKO-TEX® meets requirements for pH value and content of harmful substances, such as pesticides and heavy metals.

SORONA® AURA

Sorona® Aura fiber is an eco-efficient performance fiber. It is partially plant-based and can be recycled in any normal polyester recycling stream. Sorona® Aura is a top-of-the-line material, which offers lightweight, breathable and warmth features. The main consumer benefits are seen over the life of the garments as Sorona based fabrics maintain a high level of stretch, recovery and colour fastness wash after wash.

SUGENRO®

Sugenro® is a recycled thermal insulation wadding. GRS approved Sugenro® fiber is made from recycled polyester and gives a padding which guarantees warmth and breathability, while being environmentally friendly.

DOWN INSULATION

Down is widely considered to be the best insulator, and at Nimbus we aim to offer high-quality leading materials. Down feathers are both biodegradable and recyclable, and by assuring that our suppliers guarantee No Live Plucking, we support the ethical aspect of using down.

RDS - RESPONSIBLE DOWN STANDARD

Products certified to the Responsible Down Standard (RDS) contain down or feathers from farms certified to animal welfare requirements.

BIONIC FINISH® ECO

BIONIC-FINISH® ECO represents an ecological technology and unique non-halogenated, APEO-free, fluorine-free formulations for permanent water-repellent finishing. This ecological water-repellent impregnation offers a variety of consumer-friendly features such as rejecting water and aqueous soiling substances, being washable and suitable for all fiber types. It has the advantage of not having any negative effect on breathability, no fluorinated compounds and being formaldehyde free. BIONIC-FINISH® - Registered Trademark of RUDOLF GmbH

SPANO

For our non-iron shirts we use Spano “Advanced Cotton” technology. Instead of using conventional methods, applying a chemical onto the finished product, we have chosen this Inside Cross Linking technology, which allows to influence the core of the textile fibers from inside themselves. This results in fabrics and non-iron shirts with extremely high recovery and guaranteed flattening after wash.

HEIQ FRESH

HeiQ Fresh is a family of silver-free odour control textile technologies with ingredients that are either bio-based or mineral-based. HeiQ Fresh products tackle the problem of smells on textiles effectively by absorbing VOC (Volatile Organic Compound or the “smelly molecules”). HeiQ Fresh is Bluesign submitted; a certification that applies to chemicals, processes, materials and products, certifying it is safe for the environment, workers and consumers.

AMFORI & SMETA

Nimbus is an Amfori BSCI member and we use Amfori and SMETA audit reports to promote and verify safe and fair working conditions and ethical business practices. More than 90% of our styles are produced on Amfori audited factories. Amfori and SMETA audits increase visibility and give confidence that we are working with sustainable suppliers.

CODE OF CONDUCT

Our Code of Conduct lays out our principles, standards, and the moral and ethical expectations to which our employees and third parties are held as they interact with our organisation.

Our Code of Conduct is a set of rules, principles, values, employee expectations, behaviours, and relationships that we consider important and that summarise our commitment to sustainability. We strive to make a positive difference to our social, environmental, and economic responsibilities.

10

TO FOLLOW

1 | Nimbus will support and respect the protection of internationally proclaimed human rights.

2 | Nimbus will make sure that they are not complicit in human rights abuses.

3 | Nimbus will uphold the freedom of association and the effective recognition of the right to collective bargaining.

4 | Nimbus supports the elimination of all forms of forced and compulsory labour.

5 | Nimbus will support the effective abolition of child labour.

6 | Nimbus will abolish discrimination in relation to work and employment conditions.

7 | Nimbus will support a precautionary approach to environmental challenges.

8 | Nimbus will support initiatives to promote greater environmental responsibility.

9 | Nimbus will encourage the development and diffusion of environmentally friendly technologies.

10 | Nimbus will work against corruption in all its forms, including extortion and bribery.
