ALL YOU NEED TO KNOW ABOUT OUR COTTON BLENDS:

When elegance *meets comfort*

HIGH-QUALITY, ORGANIC COTTON

LONG STAPLE COTTON

There are two broad groups of cotton; long staple cotton and shorter staple cotton. Long staple cotton yields extraordinary long fibres and is known for weaving strong, soft and durable high-quality fabrics due to its superior strength and uniformity. The use of high quality long staple cotton in all our products is one of the reasons our cotton products stand out from the crowd.

ORGANIC COTTON

Organic cotton is grown without the use of synthetic pesticides, artificial fertilizer and other toxic chemicals. By law, organic cotton plants cannot come from genetically engineered seeds, and strict regulations dictate how cotton must be grown to be certified organic. In addition to environmental benefits, organic cotton is known to create softer, more durable, and long-lasting clothing and is less likely to cause allergic skin reactions. Nimbus styles that are produced with organic cotton are marked with our own "Certified Organic Cotton" symbol.

ALL YOU NEED TO KNOW ABOUT OUR CASHWOOL[®] KNIT:

Extra-fine Italian Merino yarn

TOP QUALITY YARN FROM ZEGNA BARUFFA

MERINO WOOL

Products in 100% Merino wool are made in top-quality material. Merino Wool is a natural material shorn from Merino Sheep, which is a breed characterized by its very fine and soft wool – the thinner and soft fibres make Merino a premium material and one of the most popular, high-quality wools for knitwear. Merino has high levels of warmth, breathability and softness against the skin.

ZEGNA BARUFFA

Zegna Baruffa is a stamp of quality. The company Zegna Baruffa Lane Borgosesia is considered one of the leading spinners from the Biella area; Italy's wool capital. They offer some of the highest quality Merino yarns available on the market by combining manufacturing tradition with technological innovation and the value of Italianness with international perspectives. Sustainability is a central value within Zegna Baruffa, and throughout their history, they have won several awards for ethical and social practices. All their products are evaluated in compliance with the Reach regulation and are Oeko-Tex certified.

ALL YOU NEED TO KNOW ABOUT OUR WOOL BLENDS:

A range for the **connoisseur**

PREMIUM BIELLA YARN

MERINO WOOL

Biella Yarn is the premium label of the family owned company Südwolle Group. The name refers to the town Biella in northern Italy, which has been leading the manufacturing of wool since the 1800s.

Biella Yarn offers some of the highest quality Merino yarns available on the market - spun from Merino wool, which is a finer and softer wool than regular wool and sourced from Merino sheep. Merino sheep has developed the softest and finest fleece, and with modern day spinning technology and fibre treatments, merino wool makes outstanding fabrics and final garments with both style, comfort and performance brought together in perfect harmony.

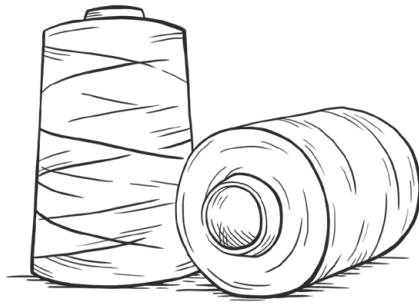

OUR MERINO BLENDS

Südwolle has specialized in spinning, dyeing and blending wool with other fibres, and their yarns have the latest eco certifications including Bluesign and Oeko-Tex standards.

In our Nimbus merino blend program, the yarn is made of 50% Biella yarn and 50% anti-pilling acrylic which ensures that the knit keeps its fit. The fine merino blend gives the knit a soft, light and luxurious touch. Furthermore, the yarn is top-dyed, which means that the fibres are dyed before spinning the yarn - compared to yarn-dyed, where the yarn is dyed after spinning. This gives the yarn a super soft touch.

HOW TO TREAT

Your Merino wool

100% MERINO WOOL AND MERINO BLENDS

Our luxurious Merino products are easy to care for. They need to be treated gently but are machine washable in wool / delicate / handwash programs, which feature lower speeds of agitation or tumbling during the wash cycle as well as lower speed spins and low water temperature. Always check the washing instructions on the individual piece of clothing before washing.

GOOD TO KNOW

High heat hurts natural fibres. Flat dry the knit and reshape it as much as possible. Keep it away from sunlight and let it air-dry.

PREVENT PILLING

Use a Sweater Comb for de-pilling. Simply glide the screen across the pillied areas, and it will pick up loose fibres and gather the yarn that detaches after friction and wearing.
